James Ward

Level 13 Software Engineer

EXPERIENCE POINTS

TOOLS I ENJOY

Engineering ► HumanFirst

October 2020 — Current

Building software to enable safe, effective, and equitable healthcare operations at home.

- Kept the engineering team's technical strategy aligned with business goals to deliver products driven by both data and user feedback - from the first lines of code of our public API to delivering lines of features that closed sales.
- Led the engineering team to SOC2 and HIPAA readiness via creation of disaster recovery plans using infrastructure as code, incident preparedness playbooks, and features to support the principles of least privilege.
- Developed best practices for both the Typescript backend and React frontend as well as automations to keep the team aligned to those practices.

Co-Founder ► Common Room

January 2020 — August 2020

Brought together an engineering team to build a novel community engagement product, setting the cultural and technical vision for the company.

- Developed React Native & React Native Web frontend for the user and end-user portions of the flagship community product utilizing React Hooks and CSS-in-JS.
- Created plan and approach to hire the first three engineers to the team to build an MVP product.

Senior Engineering Manager ► Venmo

October 2018 — December 2019

Organized the Platform as a Service team - developing the mission, vision, capabilities, and roadmap to encourage a high performing team with a strong sense of ownership.

- Develop cross-functional initiatives migrating Venmo to a distributed architecture.
- Brought reliability from 90% to 99.999% - from 73 hours to less than 30 seconds of downtime per month.
- Coordinate D&I recruiting initiatives to improve representation of underrepresented groups in hiring.

Co-Founder ► Forkbombus Labs

November 2015 — September 2018

Understanding the human element behind threats to manage the risks they pose.

- Built the Hivemind deception and threat intelligence platform using Node, Kafka, Tensorflow, Postgres, and Elasticsearch to support real-time personalization encouraging intruders to engage so they could be fingerprinted and tracked.

Senior Engineering Manager ► Wayfair

February 2014 — February 2017

Software Engineer ► Limestone Networks

April 2012 — February 2014

Software Architect ► Accrisoft

February 2011 — April 2012

Experience points truncated for optimal viewing. Detailed points prior to November 2015 available upon request.

Java

Spring, Hibernate, Dropwizard,

Storm, Spark

PHP

Laravel, Symfony

SQL

MySQL, T-SQL, PostgreSQL,

CockroachDB

Cobol

COBOL-85

Pascal

Delphi

Python

Django, AsyncIO, Twisted,

Pandas, Flask, Keras, Tornado,

Celery, Heron
